KeeMakr.ai

OPEN ROLE · KEEMAKR AI

Junior AI Engineer

Immediate start, location not specified **Rs.9-11 LPA (Full-Time) or Rs.50-60K/month (Intern with PPO)**

SUMMARY

Build production LLM-powered features, full-stack AI applications, and autonomous agent workflows for AI-native business operations.

ABOUT THE ROLE

Join a stealth-mode startup building the future of AI-powered work. You'll ship production features from week one, building LLM-powered applications and agent workflows that run real businesses. This is for builders who've already shipped. We want to see your GitHub, your demos, and your ability to walk through code you've written. If you've built something with AI and can show it, we want to talk.

WHAT YOU'LL NEED

- B.Tech/B.E. in CS, IT, ECE, or Math & Computing
- Built at least one project using LLM APIs (OpenAI, Claude, Gemini) with public GitHub repo
- Strong proficiency in Python OR JavaScript/TypeScript
- Active GitHub profile with original code (not just forks)
- Ability to explain and demo your own code in technical interviews

NICE TO HAVE

- Experience with RAG pipelines or vector databases
- Deployed full-stack AI applications to production
- Open-source contributions to AI/ML projects
- Built AI agents with tool calling and orchestration
- Hackathon projects with working demos
- Experience with LangChain or LlamaIndex

THE STACK

Python · TypeScript · React · Next.js · FastAPI · Claude API · OpenAI · LangChain · LlamaIndex · PostgreSQL · Supabase · Pinecone · Vector DBs
