OPEN ROLE · KEEMAKR AI

Web Game Developer (AI-Powered)

Mumbai / Remote India **Rs.8-14 LPA (based on skills)** **1+ yrs experience**

SUMMARY

Build interactive web experiences, games, and playable demos that showcase AI capabilities through creative engineering.

ABOUT THE ROLE

Join a stealth-mode AI company building agents that run real business operations. You'll create playable experiences that let prospects interact with AI before they buy. Think AI sales agents you can 'play against', gamified training simulations, and interactive product tours. This is a creative engineering role where working demos matter more than perfect code, and user delight is the goal. We value speed, creative problem-solving, and making people say 'wow' when they interact with your work.

WHAT YOU'LL NEED

- 1-3 years building interactive web experiences or games
- Strong JavaScript/TypeScript with clean, performant code
- Experience with HTML5 Canvas, WebGL, or web game frameworks (Phaser, PixiJS, Three.js)
- Portfolio of shipped interactive projects (games, demos, simulations)
- Comfortable integrating APIs, especially AI/LLM APIs
- Eye for UX and micro-interactions

NICE TO HAVE

- Game design sensibility and understanding of what makes things fun
- Experience with Unity WebGL exports or PlayCanvas
- Animation skills (GSAP, Lottie, CSS animations)
- Multiplayer/real-time experience (WebSockets, Socket.io)
- 3D web experience (Three.js, Babylon.js)

THE STACK

TypeScript · JavaScript · React · Next.js · HTML5 Canvas · Phaser.js · PixiJS · Three.js
